陶氏新一代ENGAGE™ 系列聚烯烃弹性体 助力实现少即是多

**Dow next generation ENGAGE™ series
of polyolefin elastomers enable you to do
more with less**

随着汽车行业的快速发展，全球对于二氧化碳减排和汽车成本控制的需求日趋苛刻，从而对汽车塑料部件提出了更轻、更薄、更耐冲击的要求。陶氏新一代ENGAGE™ 系列聚烯烃弹性体能全面提升相关性能，助力实现少即是多。

Dow next generation ENGAGE™ series of polyolefin elastomers enable you to do more with less. In today's fast-evolving automotive world, that means a lot. The growing global demand for CO₂ emission reductions and cost competitive vehicles has increased the need to create lighter and thinner parts that still meet toughness requirements. Dow next generation ENGAGE™ series, you can address these trends.
